

## REMARKS

In response to the Advisory action dated September 26, 2006, Applicants respectfully request reconsideration based on the above claim amendments and the following remarks.

Applicants respectfully submit that the claims as presented are in condition for allowance.

Claims 1-20 are pending in the present Application. Claim 1 has been amended leaving Claims 1-20 for consideration upon entry of the present amendment and following remarks.

Support for the claim amendments is at least found in the specification, the figures, and the claims as originally filed. Support for amended Claim 1 is at least found in originally filed Figure 2.

No new matter has been introduced by these amendments. Reconsideration and allowance of the claims are respectfully requested in view of the above amendments and the following remarks.

### Claim Rejections Under 35 U.S.C. §102

In the Final Office action of June 1, 2006 and in the Advisory action of September 26, 2006, Claims 1-3, 5 and 9 stand rejected under 35 U.S.C. §102(e) as being anticipated by Kaminsky et al., U.S. Patent No. 6,898,012, (hereinafter "Kaminsky"). Applicants respectfully traverse the rejections.

"A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." *Verdegaal Bros. V. Union Oil Co. of California*, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir. 1987).

Amended Claim 1 recites, *inter alia*:

"reflecting layer deposited *on the first surface of the base film where no protrusion is formed* and on the protrusion, for reflecting light generated from a lamp; wherein the protrusion partly covers the first surface of the base film and the *reflecting layer contacts with the first surface of the base film.*" [Emphasis added.]

In the Final Office action and the Advisory action, base 20, major/minor/intricate/simple lenses 22/24/30/32 and aluminum coating 34 of Kaminsky are considered as disclosing the base film, protrusion and reflecting layer, respectively, of the claimed invention.

Kaminsky discloses minor lenses 24 on the surface of the major lenses 22 which are applied to base 20. (Col. 17, lines 56-65 and Figure 1.) Intricate complex lens 30 and simpler complex lens 32 are collections of the minor and major lenses 24 and 22 in varying height to width ratios. (*Id.*) As specifically disclosed by Kaminsky, the aluminum coating 34 is applied to the surface of the complex lenses 30 and 32 and does not contact the base 20 in any way. (Figure 1.) Figure 1 shows the aluminum coating 34 disposed only along the profile of the lenses 22/24/30/32 and not on any part of the base 20. That is, the aluminum coating 34 is not disposed on any part of the base 20, let alone the surface 26 of the base 20. Therefore, Kaminsky does not disclose reflecting layer deposited on the first surface of the base film where no protrusion is formed and on the protrusion, for reflecting light generated from a lamp, and the reflecting layer contacts with the first surface of the base film of amended Claim 1.

Additionally, Kaminsky also discloses the major/minor/intricate/simple lenses 22/24/30/32 cover the base 20. That is, there is no portion of the surface of the base 20 where *no* major/minor/intricate/simple lenses 22/24/30/32 is formed, let alone where the aluminum coating 34 is formed. Therefore, Kaminsky further does not disclose reflecting layer deposited on the first surface of the base film where no protrusion is formed and on the protrusion, for reflecting light generated from a lamp, and the reflecting layer contacts with the first surface of the base film of amended Claim 1.

Thus, Kaminsky fails to disclose all of the limitations of amended Claim 1 and does not anticipate amended Claim 1. Applicants respectfully submit that Claim 1 is not further rejected or objected and is therefore allowable. Claims 2, 3, 5 and 9 variously depend from Claim 1 and are correspondingly allowable. Reconsideration, withdrawal of the relevant rejections and allowance of Claims 1-3, 5 and 9 are respectfully requested.

### **Claim Rejections Under 35 U.S.C. §103**

For an obviousness rejection to be proper, the Examiner must meet the burden of establishing that all elements of the invention are disclosed in the prior art and that the prior art relied upon, coupled with knowledge generally available in the art at the time of the invention, must contain some suggestion or incentive that would have motivated the skilled artisan to

modify a reference or combined references. *In re Fine*, 5 U.S.P.Q.2d 1596, 1598 (Fed. Cir. 1988); *In Re Wilson*, 165 U.S.P.Q. 494, 496 (C.C.P.A. 1970); *Amgen v. Chugai Pharmaceuticals Co.*, 927 U.S.P.Q.2d, 1016, 1023 (Fed. Cir. 1996).

Claim 4 is rejected under 35 U.S.C. §103(a) as being unpatentable over Kaminsky in view of previously cited Sinkoff, U.S. Patent 6,724,529 (hereinafter "Sinkoff").

Claims 6-8 and 15 are rejected under 35 U.S.C. §103(a) as being unpatentable over Kaminsky in view of previously cited Yang et al., U.S. Patent No. 6,151,089 (hereinafter "Yang").

Claims 10-14 and 16-20 are rejected under 35 U.S.C. §103(a) as being unpatentable over Kaminsky in view of previously cited Hira et al., U.S. Patent No. 5,961,198 (hereinafter "Hira"). Applicant respectfully traverses.

Claims 4, 6-8 and 10-20 variously depend from Claim 1. As discussed above, amended Claim 1 is allowable over Kaminsky. Claims 4, 6-8, 10-20 variously depend from Claim 1 and inherit all of the limitations of amended Claim 1. Sinkoff, Yang and Hira do not disclose reflecting layer deposited on the first surface of the base film where no protrusion is formed and on the protrusion, for reflecting light generated from a lamp, and the reflecting layer contacts with the first surface of the base film of amended Claim 1 and do not remedy the deficiencies of Kaminsky.

Thus, Kaminsky, Sinkoff, Yang and Hira, alone or in combination, fail to teach or suggest all of the limitations of Claim 4, 6-8, 10-20. Applicants respectfully submit that Claims 4, 6-8, 10-20 are not further rejected or objected and are therefore allowable. Reconsideration and allowance of Claims 4, 6-8, 10-20 are respectfully requested.

### **Conclusion**

All of the rejections are herein overcome. In view of the foregoing, it is respectfully submitted that the instant application is in condition for allowance. No new matter is added by way of the present Amendments and Remarks, as support is found throughout the original filed specification, claims and drawings. Prompt issuance of Notice of Allowance is respectfully requested.

Application No. 10/705,591  
Response dated: November 1, 2006  
Reply to Advisory action of September 26, 2006  
(Final Office action dated June 1, 2006)

The Examiner is invited to contact Applicants' attorney at the below listed phone number regarding this response or otherwise concerning the present application.

Applicants hereby petition for any necessary extension of time required under 37 C.F.R. 1.136(a) or 1.136(b) which may be required for entry and consideration of the present Reply.

If there are any charges due with respect to this Amendment or otherwise, please charge them to Deposit Account No. 06-1130 maintained by Applicants' attorneys.

Respectfully submitted,

CANTOR COLBURN LLP
